I. OUTLINE OF THE STUDY

§1 Past and Present Studies

The Research Committee originated the study of the Japanese national character with the first nationwide survey in 1953. Since then, a similar statistical survey has been conducted every five years, for a total of twelve surveys.

Each survey has been carried out using a face-to-face interviewing method with samples of 3,000 to 6,400 Japanese nationals, aged 20 and over—an upper age limit has been set since the 11th installment of the survey, so that only those younger than 80 are sampled. Samples were selected by stratified multi-stage sampling.

In each survey, the questionnaire contained approximately 50 items, most of them being similar to those utilized in the previous surveys. However, since 1973 two different types of questionnaires have been used. One consists of items used in preceding surveys (referred to as 'K-type'), the other consists mainly of new items (referred to as 'M-type').

Also in the twelfth survey, these two types of questionnaire were used, and each questionnaire was administered to one half of the total number of respondents. Most of the questions in the K-type questionnaire had previously appeared in the questionnaires of one or more of the previous surveys, most of them having been common to all surveys. In contrast, the majority of questions in the M-type questionnaire were developed after 1973. These items were formulated for the following reasons:

- (a) It was thought that the content of some of the questions might be outdated or no longer adequate, because over 50 years had passed since the original questionnaire items were formulated.
- (b) New questions were needed to facilitate the analysis of future attitude trends.

Thus the latest twelfth survey has two major objectives. One is to clarify what aspects of people's ways of thinking have changed over the last half century, based on the analysis of responses to questions asked repeatedly over this period. The other objective is to investigate new aspects of attitude trends in Japan.

§2 Sampling and Interviewing Methods

Selection of the sample of the twelfth survey was carried out by the stratified two-stage probability sampling method. First, boroughs, cities, towns and villages were stratified, taking into population size and other factors into consideration. From each stratum administrative districts were randomly chosen, with the probability of selection being proportionate to the population size of target age groups. In the twelfth survey, 400 administrative districts were thus selected (Stage 1). Second, from Basic Resident Registers in the administrative districts selected, respondents were chosen by means of systematic random sampling (Stage 2). A total of 6,398 respondents were drawn for the twelfth survey.

Surveys up to the eighth wave were carried out with the cooperation of many universities. After the survey districts had been assigned to the universities, members of the Committee

visited these universities and gave instructions to student interviewers. However, the ninth to eleventh surveys were conducted with the cooperation of Central Research Services, Inc., and for the current 12th installment, the actual implementation in the field was entrusted to Shin Joho Center, Inc.. For the 1st and 12th installments of the survey the Basic Resident Register, and for all others between 2nd and 11th waves the Voter Registration List, respectively, were employed as the sampling frame. In many cases, the interviewers were responsible for randomly selecting sample from the list according to a specified procedure. In any event, the principle is that individuals were sampled based on the method of systematic random sampling in all the installments of the survey. (There was an average of 16 respondents for each district in the twelfth survey.) Interviewers then conducted interviews in the respondents' homes and recorded the responses on the interview sheets. In the case of the twelfth survey, out of the target sample of size 6,398, 3,302 were completed, a completion rate of 52%. (The details of the incompleteness rate are summarized in Tables 1 to 5.)

The questions and simple tabulations of responses in these twelve nationwide surveys are summarized in the following chapter.

The research committee for the twelfth nationwide survey consisted of Takashi Nakamura (Coordinator), Ryoza Yoshino, Tadahiko Maeda, Takahiro Tsuchiya, and Wataru Matsumoto. Also, we were able to benefit from a variety of cooperation kindly offered by the following individuals: Yoshiyuki Sakamoto, Prof. Emeritus of The Institute of Statistical Mathematics, Prof. Masakatsu Murakami of Doshisha University, Prof. Fumi Hayashi of Toyo Eiwa University, Prof. Yuejun Zheng of Doshisha University, Prof. Takahiro Hoshino of Nagoya University.

As shown on the cover, basically, this is a translation of a report originally published in Japanese in 2009 by Takashi Nakamura, Tadahiko Maeda, Takahiro Tsuchiya, and Wataru Matsumoto.

Ms. K. Itoh and Ms. M. Yoshida helped edit this report and typed it. The authors are very grateful for their assistance.

§3 Key Points from Our Results

The following is an excerpt from the press release for the results of the 12th installment.

1. Assessment of the Japanese Economy: A Continuing Downward Trend

The most conspicuous change of the past 20 years in the attitudes of Japanese people must be the rapid spread of what might be called “the pessimistic view of society” that took place from 1993 to 1998, and such phenomenon may be said to constitute the “loss of confidence” among the Japanese.

For example, the proportion of respondents who have said that the strength of the Japanese economy (#9.12c) was “very high” or “fairly high” has decreased markedly from 79% in 1993 to 32% in 1998, and that proportion has dropped steeply from 74% in 1993 to 53% in 1998 with respect to the “standard of living” (#9.12d). In the most recent 12th installment of our survey, the respective proportions were 37% for the economic strength and 49% for the standard of living, thus showing some signs that people may be regaining confidence about the strength of the national economy. But overall, it cannot be said that the public opinion has shown enough upward trend to fully overcome the gloom of the last 10 to 15 years and climbed back to the level of confidence and optimism of the years past.

21% of the respondents have said their own standard of living in the past 10 years has either “gotten better” or “gotten slightly better” (#7.30a), and that number is about the same as the 20% reported in the previous 11th installment conducted in 2003. Likewise, the proportion of respondents who are “satisfied” or “rather satisfied” is 30% (#2.3d), meaning it has remained at the same level since 2003 (Chart 1).

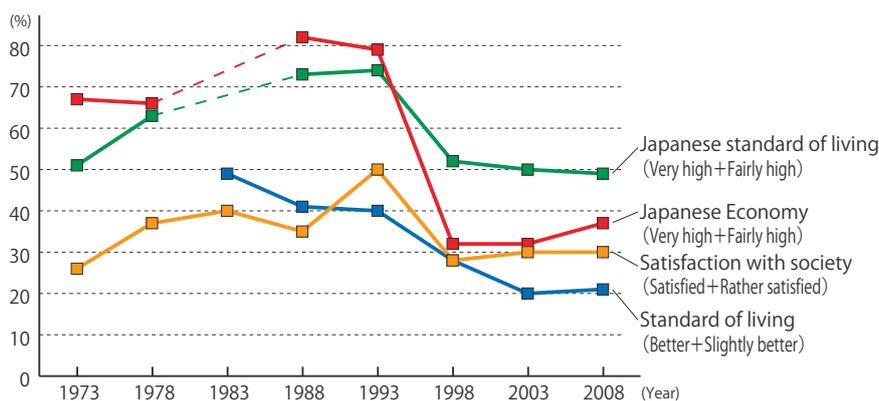

Chart 1: Pessimism on the State of Japanese Society and Economy

In this state of society, people are finding it difficult to maintain an optimistic outlook toward the future (Chart 2). For the past 10 years the proportion of people who believe that “people’s peace of mind will diminish” (#7.18b) has hovered around 70%; and those who believe that “people’s freedom will diminish” (#7.18c) have increased by 5 percentage points and now comprise 40% of the respondents. The proportion of people who believe that “people will become more affluent in the future” (#7.18d) has declined to an all-time low of 11% from the 14% observed in 2003, and in contrast those saying that people will become worse off have increased their share to the all-time high of 57%, from 47% in 2003.

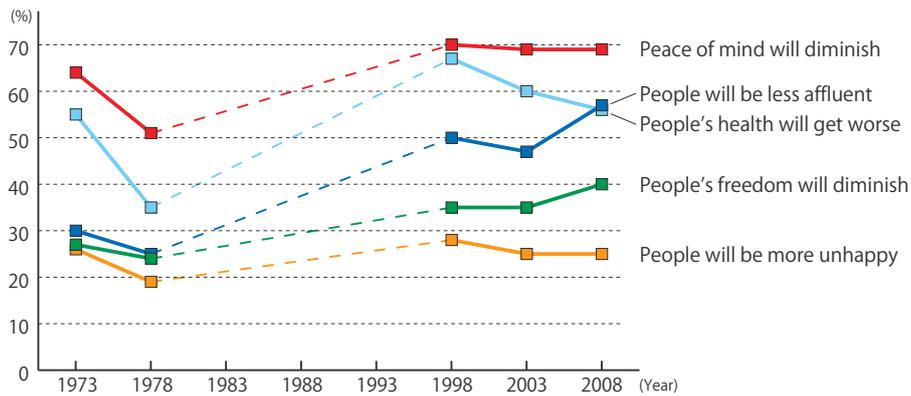

Chart 2: Changes in the Proportion of People with a Pessimistic Outlook on the Future of Society

We see that throughout the survey years around 1/4th of respondents have expressed a pessimistic outlook toward the future as the view that “people will be unhappy”; more than half the respondents still say that “people’s health will get worse” though the proportion taking this stance has decreased for the past decade.

2. Increase in the Number of Youth Who Are “Frustrated”

As if reflecting this generally gridlocked state of society, the proportion of people who have experienced some sort of “nervousness” for the past month (#2.80c) has reached 48%, the highest mark in the last 15 years. In each installment of the survey this proportion of people who have experienced nervousness has been greater among the young, and in particular we find that for the first time it has moved over 60% among people in their 20s (63%) and the 30s (62%) (Chart 3).

A more detailed look at the data reveals that while increase in this proportion has occurred across all age groups from 1993 to 1998, from 2003 to 2008 it has occurred among those who are younger than 40.

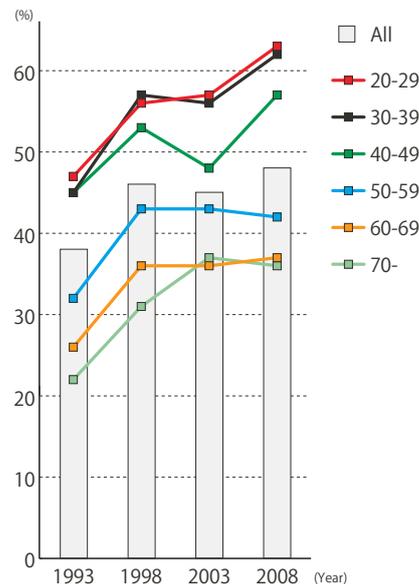

Chart 3: Increase in the Number of Young People Experiencing Nervousness

We can also find out what factors other than age are associated with the feeling of nervousness by cross-classifying it with those selected variables (Chart 4). For instance, we see that while 33% of the respondents who are satisfied with their job or workplace have reported experiencing nervousness, the proportion more than doubles to 73% among those who are dissatisfied. Likewise, we can see that people are more likely to express nervousness the more they are dissatisfied with their lives in general, and the more they feel anxious about their economic circumstances.

While in this passage we have only looked at three factors, it is also known that the feelings of nervousness are associated with many sorts of anxiety and dissatisfaction in different facets of people’s lives, as well as with dissatisfaction with the society in general. Also, to one extent or another such association may be observed across all age groups.

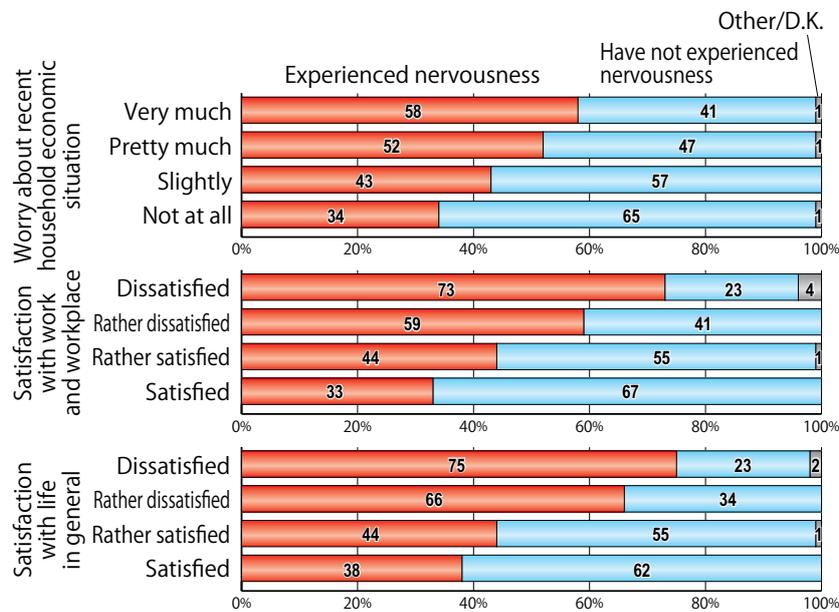

Chart 4: Examples of Factors that Are Associated with Nervousness

3. Movement to Reconsider Interpersonal Relationships at the Workplace

Since the 1980’s people’s attitudes toward the workplace have gradually shifted to preferring the kind of interpersonal relations that are basically dry and laid-back - but in the past decade, we see evidence of a budding movement to reconsider the merits of a denser, more involved sort of relationship at the workplace, especially among the young.

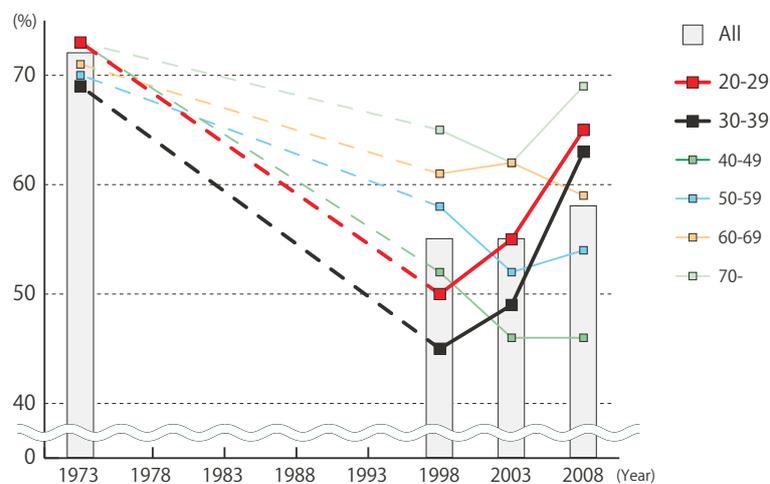

Chart 5: Shift in the Proportion of People Who Have Said “Better to Have Social Contact with Superior” by Age

For instance, proportion of people who have said it is better to have social contacts with a workplace superior outside of work (#5.6*) has decreased from 72% in 1973 to 55% in 1998 when all age groups are aggregated, but that proportion has increased slightly to 58% in the 2008 installment. This proportion of people who have said it is better to have social contacts with a superior has increased markedly among those in the 20s from 50% (1998) to 65% (2008), and from 45% (1998) to 63% (2008) among those in the 30s, in fact approaching the level in 1973 (respectively 73% and 69%) (Chart 5).

The tendency to avoid a denser, more involved kind of relations at the workplace - as measured by a question asking whether a boss who “always sticks to the rules and never demands any unreasonable work but who never does anything for you personally” is preferable or not - has in general increased for the 20 years between 1983 and 2003, and in particular among the young (#5.6). In the most recent installment, however, that proportion has decreased by 3 percentage points to 15% from 18% in 2003. Among the young, we see that the proportion preferring a drier and less involved interpersonal relation at the workplace has either bottomed out in the last 10 years or so, or even decreased (Chart 6). This also means that the type of boss with the contrasting style, one who “sometimes demands extra work in spite rules against it, but who, on the other hand, looks after you personally in matters not connected with work”, is regaining popularity. Influenced partly by trends among the young, we also see in the aggregate that in the past 5 years the “involved” boss’ popularity is on the rise slightly again.

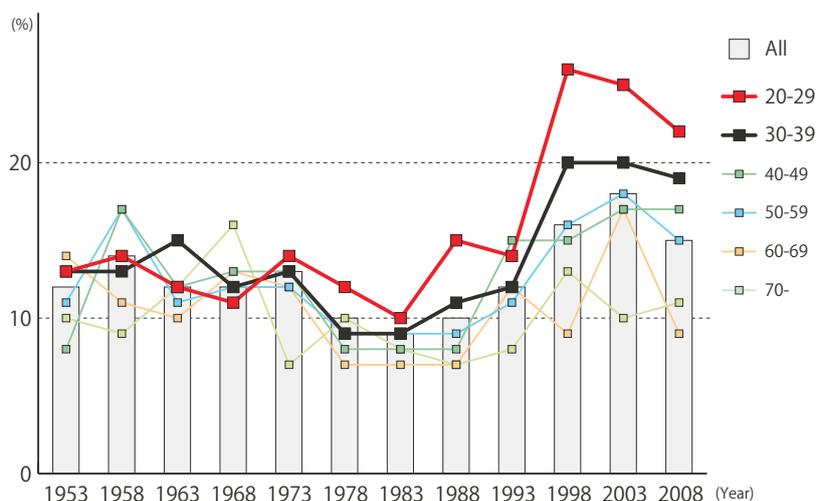

Chart 6: Shift in the Proportion of People Who Have Said that a Boss Who “Never Looks After You Personally” Is Preferable by Age

Further, the proportion of people who have said that they would like to work for a “firm with a family-like atmosphere which organized outings and sports days, even if the wages were a little bit less” (#5.6b) among those in the 20s have halved from 76% in 1973 to 35% in 2003, but in 2008 we see that the proportion has moved up by 10 percentage points to 45%.

4. Search for Spiritual Fulfillment and a Psychological Anchor

Paralleling the predilection toward reconsideration of the importance of interpersonal relations as described above, we also see some evidence of what might be termed a newfound search for spiritual fulfillment and for things that could serve as a psychological anchor in one’s life.

The most numerous choice for the “most important thing in life” (#2.7) is “family” with 46% of the respondents picking it, and its proportion of the total responses is also the highest ever recorded in 2008 (Chart 7). At the same time, the proportion choosing “love, spirit” has increased from 2003 to 2008 across all age groups except the 70s: from 20% to 23% for the 20s; from 13% to 17% for the 30s; from 8% to 17% for the 40s; from 11% to 13% for the 50s; and from 14% to 18% for the 60s).

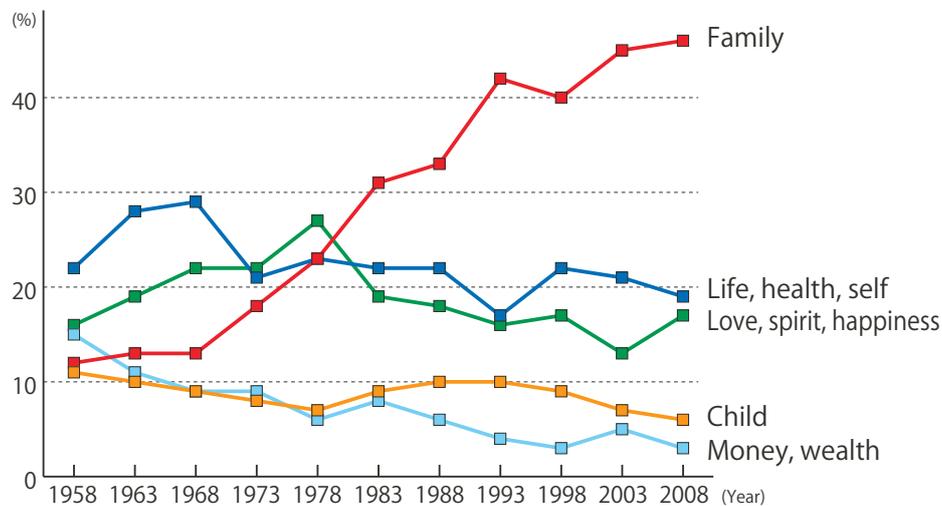

Chart 7: Shift in Response to the Question on “the Most Important Thing in Life” (#2.7)

Also, the proportion of respondents who have said they wanted to “do what is of benefit to other people, whether or not it is what I want to do myself” (#2.11), has reached the highest point recorded, with 43% for the 20s and 52% for the 30s, respectively (Chart 8). As is obvious from this chart, this particular response has become markedly popular among those younger than 40 since 2003.

Further, the proportion of people who have expressed a belief in a “life after death” (#3.5) has doubled in 50 years, from 20% in 1958 to 38% in 2008. In particular, we see that nearly half - 49% - of those in the 20s say they believe in this idea.

It might be surmised that these results are signs that people are attempting to find new ways toward spiritual fulfillment as well as things that could serve as anchor in their lives in an increasingly mechanistic and stagnant society.

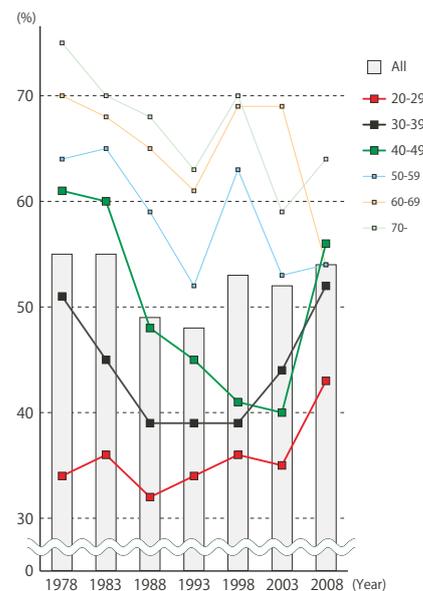

Chart 8: Shift in the Proportion Saying They Like to “Do What Is of Benefit to Other People”, by Age

5. Propensity Toward Expressing Will Through Elections

With regard to people's political consciousness, it appears reasonable to argue that there is a newly arising trend that characterizes the last 5 years in addition to changes that have been occurring over a very long term, and over the last 20 or so years. In particular, we can observe that in the past 5 years there is a noticeable increase in the predilection to express some sort of social or political will through elections (Chart 9).

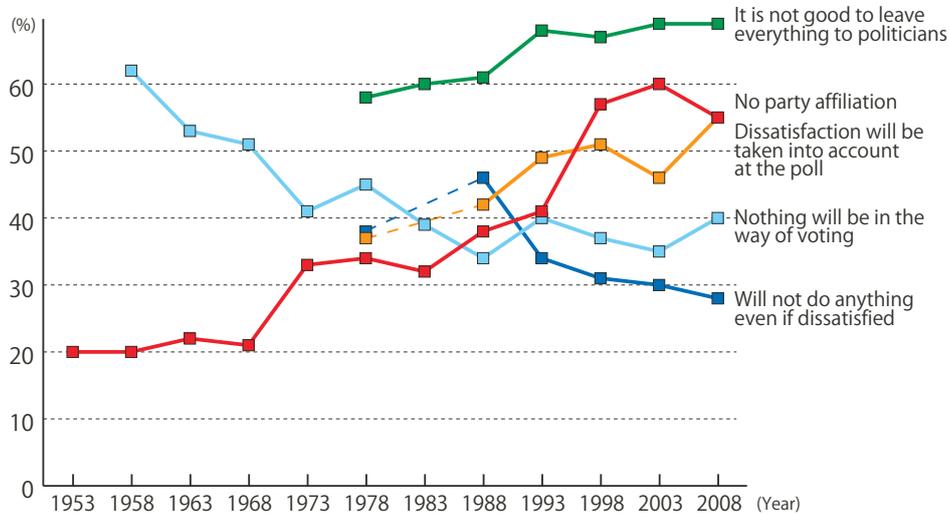

Chart 9: Shift in Political Consciousness

The proportion of people indicating no particular preference with regards political party affiliation (#8.7h, #8.7i, #8.7j) was around 20% in 1953 when the survey began, but over time it has reached 60% in 2003. While it is obvious that an increase in the “independents” is the broader long-term trend that has held true for half a century, yet for the past 5 years we observe that this proportion has decreased by 5 percentage point to 55% from 2003.

The proportion of people who believe that they should not “leave everything to them” even if there were outstanding political leaders (#8.1b) has shown a comparatively large increase from 1988 to 1993, and thereafter it has remained at that level since.

Further, those who say that they would “not do anything” when they had some dissatisfaction with society (#8.9) fell to 28% after observing a sharp drop to 34% in 1993 from 46% in 1988. On the other hand, those who would “take it into account when you go to vote” increased their share to 55% from the previous 42%, which is the highest mark recorded for this question.

The proportion of respondents saying that they would not “let anything stand in the way of voting” (#8.6) in a national election (House of Representatives) has increased by 5 percentage points from 5 years ago to 40%, compensating for the decline observed in the previous two installments.

6. Rebound in the Confidence in Scientific Technology and Art

Previously we have described how the Japanese public opinion towards its economic health has not transcended the tone of pessimism. But with respect to some other aspects of society, we see that people's assessment of Japan is on the rise again. The proportion of people who have said that the country's “level of science and technology” (#9.12) was “very high” halved

from 46% in 1993 to 24% in 1998, but that proportion rebounded to 35% in the current 2008 installment. Also, the proportion of people who say that the “artistic achievements of Japan” (#9.12b) are “very high” doubled to 13% in 2008 from 7% in 1998, and the combined figure of 72% for those responding with either “very high” or “fairly high” to this question is the highest mark we have observed (Chart 10).

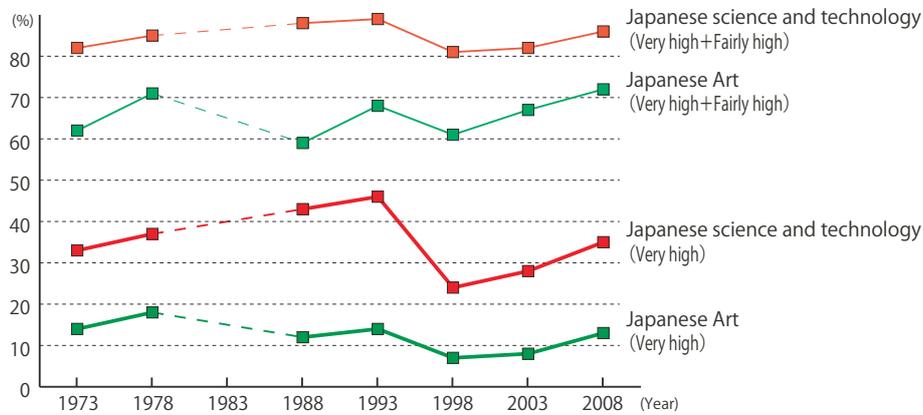

Chart 10: Selected Items about which People’s Views of Japan Are Improving

Also, although it comes from a question that has been included for the first time in the current 2008 installment such that it can’t say anything about longitudinal change, we find that as many as 77% of the respondents have said that they “would like to be born again in Japan if they were to be reborn” (#9.22c), and less than 20% saying that they would prefer another country.

It appears that Japanese people’s confidence is gradually on the rebound with respect to certain spheres of life other than the economy, as evidenced by, say, decline in the proportion of people who say that “people’s health in future will get worse” (#7.18) in Chart 2.

II. QUESTIONS AND SIMPLE TABULATIONS

1. Abbreviation

- I (1953) : The first nationwide survey in 1953
II (1958) : The second nationwide survey in 1958
III (1963) : The third nationwide survey in 1963
IV (1968) : The fourth nationwide survey in 1968
V (1973) : The fifth nationwide survey in 1973
VI (1978) : The sixth nationwide survey in 1978
VII (1983) : The seventh nationwide survey in 1983
VIII (1988) : The eighth nationwide survey in 1988
IX (1993) : The ninth nationwide survey in 1993
X (1998) : The tenth nationwide survey in 1998
XI (2003) : The eleventh nationwide survey in 2003
XII (2008) : The twelfth nationwide survey in 2008
- JPN : The Surveys of Japanese National Character mentioned above
K : K-type questionnaire
M : M-type questionnaire
* : The relevant question or category is missing.
— : The relevant response category has a zero frequency.
USA88 : The USA 1988 Survey for the “Cultural Link Analysis for Comparative Social Research”
UK87 : The UK 1987 Survey for the “Cultural Link Analysis for Comparative Social Research”
USA98 : “Personal Values Study” conducted in USA in October 1998

2. Criterion for Choosing Translated Questions

Needless to say, the surveys of Japanese national character were conducted with questions written in Japanese. Therefore, since many ways of English translation are possible, translated questions in this report are tentative. In this report, translated questions were chosen based on the following criteria:

- (1) The question in USA88 (or USA98) was adopted if it was not much different in content from the Japanese question. (Therefore, some questions are different from those published previously.)

In addition, if the translated question of UK87 is different from that of USA88 (or USA98), that is given in the footnote. (In this case, the differences are underlined.)

- (2) A question translated from the original Japanese one was adopted if there is not an appropriate translated question in USA88 (or USA98). However, if the differences are only in the response categories, the question in USA88 (or USA98) is given in the footnote.

3. Notes for Tables

Figures in tables indicate relative frequency (percentage) of a category rounded to the nearest integer. Figures in the “total” column are a simple summation of these percentages that will not sum up to 100 in some cases. Number of completed samples are shown in parentheses in that column. Multiple answer items are enclosed by double lines and summary percentages are omitted.

§2 Attitudes toward Life and Environment

#2.1 Custom vs. conscience

(USA88 98)

If you think something is right, do you think you should go ahead and do it even if it is contrary to usual custom, or do you think you are less apt to make a mistake if you follow custom?

1	Go ahead even if contrary	
2	Follow custom	
3	Undecided/it depends	
4	Other (Specify)	5 D.K.

	Ques. No.	1 Go ahead even if contrary	2 Follow custom	3 Undecided/ it depends	4 Other	5 D.K.	Total
I (1953)	4	41	35	19	1	4	100 (2,254)
II (1958)	7 107	41	35	19	1	4	100 (2,369)
III (1963)	7	40	32	25	1	2	100 (2,698)
IV (1968)	8	42	34	20	2	2	100 (3,033)
V (1973)	K11	36	32	29	0	3	100 (3,055)
VI (1978)	K 6	30	42	24	2	2	100 (2,032)
VII (1983)	K+M	29	39	29	1	2	100 (4,429)
	K 6	30	37	30	1	2	100 (2,256)
	M 5	29	40	28	1	2	100 (2,173)
VIII (1988)	K 7	27	36	35	1	2	101 (1,858)
IX (1993)	K 6	26	30	42	0	2	100 (1,833)
X (1998)	K 7	27	32	39	0	2	100 (1,339)
XI (2003)	K 7	21	27	48	1	3	100 (1,192)
XII (2008)	K 7	21	37	40	0	2	100 (1,729)

Cf. (UK87)

If you think a thing is right, do you think you should go ahead and do it even if it is contrary to usual custom, or do you think you are less apt to make a mistake if you follow custom?

- 1** Go ahead
- 2** Follow custom
- 3** Undecided/it depends
- 4** Other (Specify)
- 5** D.K.

#2.2b Consensus vs. own principle

(JPN)

(Hand card) Which of the two people described on this card would you like best?

1	A person who stresses his/her own principles	
2	A person who stresses the importance of achieving a consensus among other group members	
3	Other (Specify)	4 D.K.

	Ques. No.	1 His/ her own principles	2 The importance of achieving a consensus	3 Other	4 D.K.	Total
I (1953)	*					
II (1958)	*					
III (1963)	*					
IV (1968)	*					
V (1973)	*					
VI (1978)	K13	44	50	4	2	100 (2,032)
VII (1983)	K27	45	51	2	2	100 (2,256)
VIII (1988)	K25	42	54	2	2	100 (1,858)
IX (1993)	K28	38	56	2	4	100 (1,833)
X (1998)	K29	43	54	1	2	100 (1,339)
XI (2003)	K30	42	52	2	4	100 (1,192)
XII (2008)	K29	43	54	1	2	100 (1,729)

Cf. (USA88 98)

- 1** A person who stresses his/her own principles rather than achieving a consensus among other group members
- 2** A person who stresses the importance of achieving a consensus among other group members rather than maintaining his/her own principles
- 3** Other (Specify)
- 4** D.K.

Cf. (UK87)

Which of the following personality types do you like better?

- 1** A person who thinks the most important thing is to follow his principles when making a decision
- 2** A person who thinks the most important thing is to maintain harmony in his relations with others when making a decision
- 3** Other (Specify)
- 4** D.K.

#2.3d Satisfaction with society

(JPN)

(Hand card) How do you feel about society?

1	Satisfied	
2	Rather satisfied	
3	Rather dissatisfied	
4	Dissatisfied

Cf. (USA88 98)

In bringing up children of elementary school age some people think that they should be taught as early as possible that money is one of the most important things in life. Do you agree with this or not?

Cf. (UK87)

In bringing up children of primary school age, some people think that they should be taught as early as possible that money is one of the most important things in life. Do you agree with this or not?

#4.13 Depend on parents after getting a job?

(JPN)

(Hand card) Here are two examples of the kind of thing a parent might say to his child who has left school and got a job and is just about to leave home. Which do you think is the better?

1	If things go wrong for you in some way, you should always come and consult us first	
2	From now on, even if things go wrong for you, you shouldn't depend on your parents	
3	Other (Specify)	4 D.K.

	Ques. No.	1 Come and consult	2 Shouldn't depend	3 Other	4 D.K.	Total

§5 Face-to-Face Social Groups

#5.1 Benefactor on death-bed

(USA88 98)

(Hand card)¹⁾ Imagine this situation. Mr.A was orphaned at an early age and was brought up by Mr.B, a kind neighbor. Mr.B gave him a good education, sent him to a university, and now Mr.A has become the president of a company. One day he gets a telegram saying that Mr.B who brought him up, is seriously ill and asking if he would come at once. This telegram arrives as he is leaving to attend an important meeting which will decide whether his firm is to go bankrupt or to survive. Which of the following do you think he should do?

1	Leave everything and go back home		
2	However worried he might be about Mr.B, he should go to the meeting		
3	Other (Specify)	4	D.K.

	Ques. No.	1 Go back home	2 Go to the meeting	3 Other	4 D.K.	Total
I (1953)	41	54	41	1	4	100 (2,254)
II (1958)	111a	50	39	2	9	100 (1,449)
III (1963)	13a	46	46	2	5	99 (2,698)
IV (1968)	15a	46	47	2	5	100 (3,033)
V (1973)	K21a	51	40	2	8	101 (3,055)
VI (1978)	K15a	51	42	1	5	99 (2,032)
VII (1983)	K+M	52	41	2	5	100 (4,429)
	K16a	52	41	3	4	100 (2,256)
	M16a	52	41	2	5	100 (2,173)
VIII (1988)	K14a	52	41	3	4	100 (1,858)
IX (1993)	K18a	49	42	1	8	100 (1,833)
X (1998)	K18a	46	45	1	8	100 (1,339)
XI (2003)	K20a	41	48	2	9	100 (1,192)
XII (2008)	K18a	43	50	2	5	100 (1,729)

1) Both picture and hand card have been used in the surveys of the Japanese national character in Japan.

Cf. (UK87)

Imagine this situation. John was orphaned at an early age and was brought up by a kind neighbour who gave him a good education and sent him to a university. Now John has become the managing director of a company. One day he gets a telegram saying that the neighbour who brought him up is seriously ill and asking him to come at once. The telegram arrives as he is going in to an important meeting to decide whether his company is to go bankrupt or to survive. Which of the following things do you think he should do?

- 1 Leave everything and go back home
- 2 However worried he might be he should go to the meeting
- 3 Other (Specify)
- 4 D.K.

#5.1b Father on death-bed

(USA88 98)

(Hand card)¹⁾ The last question supposed that Mr.B had taken him in as an orphan in his youth and brought him up. Suppose that it was his real father who was seriously ill. Which would have been your answer then?

1	Leave everything and go back home
2	However worried he might be about his father, he should go to the meeting
3	Other (Specify)
4	D.K.

	Ques. No.	1 Go back home	2 Go to the meeting	3 Other	4 D.K.	Total
I (1953)	42	49	47	1	3	100 (2,254)
II (1958)	111b	50	41	2	7	100 (1,449)
III (1963)	13b	45	47	2	6	100 (2,698)

§7 General Social Problems

#7.1 Science and loss of human feeling

(JPN)

Some people say that with the development of science and technology, life becomes more convenient, but at the same time a lot of human feeling is lost. Do you agree with this opinion, or do you disagree?

1 Agree	
2 Undecided/it depends	
3 Disagree	
4 Other (Specify)	5 D.K.

	Ques. No.	1 Agree	2 Undecided/ it depends	3 Disagree	4 Other	5 D.K.	Total
I (1953)	5	30	17	35	1	17	100 (2,254)
II (1958)	3	33	17	34	0	16	100 (920)
III (1963)	6	38	22	28	1	12	101 (2,698)
IV (1968)	7	40	16	35	1	8	100 (3,033)
V (1973)	K10	50	21	22	1	6	100 (3,055)
VI (1978)	K 2	43	21	30	1	5	100 (2,032)
VII (1983)	K+M	48	20	28	1	4	101 (4,429)
	K 3	46	19	30	1	3	99 (2,256)
	M 2	49	20	26	1	4	100 (2,173)
VIII (1988)	K 4	47	24	26	1	3	101 (1,858)

XII (2008)	K 4	56	24	17	0	3	100 (1,729)

Cf. (USA88=UK87)

- 1** Agree
- 2** Disagree
- 3** Undecided/it depends
- 4** Other (Specify)
- 5** D.K.

#7.2 Mechanization and human feeling

(JPN)

Some people say that no matter how mechanized the world gets, nothing can reduce the richness of human feelings. Do you agree with this opinion, or do you disagree?

1	Disagree	
2	Undecided/it depends	
3	Agree	
4	Other (Specify)	5 D.K.

	Ques. No.	1 Disagree	2 Undecided/ it depends	3 Agree	4 Other	5 D.K.	Total
I (1953)	29 ¹⁾	17	8	58	1	16	100 (2,254)
II (1958)	24	21	10	53	1	16	101 (920)
III (1963)	12	18	19	49	0	13	99 (2,698)
IV (1968)	13	22	13	56	1	9	101 (3,033)
V (1973)	K18	31	20	42	1	7	101 (3,055)
VI (1978)	K12	25	15	53	1	6	100 (2,032)
VII (1983)	M 8	31	17	46	1	5	100 (2,173)
VIII (1988)	K27	33	22	42	1	3	101 (1,858)
IX (1993)	K13	25	24	47	0	4	100 (1,833)
X (1998)	K13	30	22	44	0	3	99 (1,339)
XI (2003)	K13	27	27	42	0	3	99 (1,192)
XII (2008)	K12	31	25	42	0	2	100 (1,729)

1) Some people say that however advanced civilization becomes, nothing can reduce the richness of human feelings. Do you agree with this opinion, or do you disagree?

Cf. (USA88)

- 1 Agree
- 2 Disagree
- 3 Undecided/it depends
- 4 Other (Specify)
- 5 D.K.

Cf. (UK87)

Some people say that however mechanized the world gets, nothing can reduce the richness of human feelings. Do you agree with this opinion, or do you disagree?

- 1 Agree
- 2 Disagree
- 3 Undecided/it depends
- 4 D.K.

#7.4 Improve the country or make people happy

(USA88)

(Hand card) Please choose from among the following statements the one with which you agree most.

1	If individuals are made happy, then and only then will the country as a whole improve
2	If the country as a whole improves, then and only then can individuals be made happy
3	Improving the country and making individuals happy are the same thing
4	Other (Specify)
5	D.K.

	Ques. No.	1 Individuals→country	2 Country→individuals	3 Country=individuals	4 Other	5 D.K.	Total
I (1953)	45	25	37	31	1	6	100 (2,254)
II (1958)	*						
III (1963)	16	30	30	34	0	7	101 (2,698)
IV (1968)	19	27	32	36	1	5	101 (3,033)
V (1973)	K25	30	26	37	0	6	99 (3,055)
VI (1978)	K17	27	27	41	0	4	99 (2,032)

VIII (1988)	K16	29	25	42	0	4	100 (1,858)
IX (1993)	K20	30	26	40	0	4	100 (1,833)
X (1998)	K20	28	28	40	0	3	99 (1,339)
XI (2003)	K22	29	24	42	1	5	101 (1,192)
XII (2008)	K20	27	28	40	0	4	99 (1,729)

Cf. (UK87)

Please choose from these statements the one with which you agree most?

- 1** If people are made happy then and only then will the country as a whole improve
- 2** If the country as a whole improves then and only then can people be made happy
- 3** Improving the country and making people happy are the same thing
- 4** Other (Specify)
- 5** D.K.

#7.4b National prosperity and general welfare

(JPN)

(Hand card) Opinions are divided about national prosperity, but which of these opinions do you agree with?

1	Even if the country becomes prosperous it only means that a minority get rich: it doesn't make life any better for the people in general
2	If the country prospers life gets better for the people in general
3	Other (Specify)
4	D.K.

	Ques. No.	1 Doesn't make life any better	2 Life gets better	3 Other	4 D.K.	Total
I (1953)	*					
II (1958)	*					
III (1963)	*					
IV (1968)	*					
V (1973)	*					
VI (1978)	M20	37	57	1	5	100 (1,913)
VII (1983)	K30	33	63	1	3	100 (2,256)
VIII (1988)	K29	47	48	1	3	99 (1,858)
IX (1993)	K30	40	55	1	4	100 (1,833)
X (1998)	K32	36	60	0	4	100 (1,339)
XI (2003)	K32	28	67	1	4	100 (1,192)
XII (2008)	K31	29	68	0	3	100 (1,729)

#7.5b* Individual rights or the public interest?

(JPN)

(Hand card) Here are some opinions. Which one would you agree with? Of course, these opinions would depend on how strong they are or what circumstances surround them. But generally speaking, which one do you think should be put the greater emphasis?

1	It cannot be helped if the public interest is somewhat sacrificed for the sake of individual rights	
2	It cannot be helped if individual rights are somewhat sacrificed for the sake of the public interest	
3	Other (Specify)	4 D.K.

	Ques. No.	1 The public interest is sacrificed for individual right	2 Individual rights are sacrificed for the public interest	3 Other	4 D.K.	Total
I (1953)	*					
II (1958)	*					
III (1963)	*

XII (2008)	M29e	2	26	50	19	0	2	99 (1,573)

#9.14 Marriage with a foreigner

(JPN)

Suppose your child said "I want to marry a foreigner." Would you approve or disapprove?

1 Approve	
2 Disapprove	
3 Depends on the circumstances	
4 Other (Specify)	5 D.K.

	Ques. No.	1 Approve	2 Disapprove	3 Depends on the circumstances	4 Other	5 D.K.	Total
I (1953)	*						
II (1958)	*						
III (1963)	*						
IV (1968)	*						
V (1973)	*						
VI (1978)	*						
VII (1983)	*						
VIII (1988)	M 3	29	36	28	4	2	99 (1,824)
IX (1993)	M 3	30	34	31	2	3	100 (1,905)
X (1998)	M 6	40	29	28	1	3	101 (1,341)
XI (2003)	M 5	41	27	29	1	2	100 (1,158)
XII (2008)	M 6	51	20	26	1	2	100 (1,573)

#9.16 International contribution

(JPN)

(Hand card) Here are two opinions concerning Japan from now on. Which comes closest to the way you feel?

1	We must help foreign countries even if our own standard of living falls somewhat	
2	Even now we still must think first about raising our own standard of living	
3	Other (Specify)	4 D.K.

	Ques. No.	1 Help foreign countries	2 Raising our own standard of living	3 Other	4 D.K.	Total
I (1953)	*					
II (1958)	*					
III (1963)	*					
IV (1968)	*					
V (1973)	*					
VI (1978)	*					
VII (1983)	*					
VIII (1988)	*					
IX (1993)	M29	35	57	1	6	99 (1,905)
X (1998)	M31	39	53	1	7	100 (1,341)
