## はしがき

本書は、日本学術振興会の科学研究費補助金の支援による「アジア・太平洋価値観国際比較調査---文化多様体の統計科学的解析---」（基盤研究 S 課題番号 No.22223006、研究代表 吉野諒三）（2010 年度-2014 年度）のシンガポール 2012 年調査の第一次報告を、統計数理研究所・調査研究リポートとして発刊したものである。

本調査研究は先行する 2002-2005 年度「東アジア価値観国際比較調査」、および 2004-2009 年度「環太平洋価値観国際比較調査」の拡大を意図した調査研究の一環であり、2010 年度は日本と米国、2011 年度は中国（北京・上海・香港）および台湾、2012 年度はシンガポール、オーストラリア、韓国において、それぞれの国・地域に応じた統計的標本抽出法に則り、面接調査が遂行された。

この研究は、歴史的には統計数理研究所における 1953 年以來の「日本人の国民性」調査及び 1971 年以來の「意識の国際比較」調査の延長上にある。「日本人の国民性」調査は、戦後民主主義の基盤としての官民の世論調査発展と緊密に結びつき、「意識の国際比較」調査は、連鎖的調査分析（Cultural Linkage Analysis, CLA）の確立へとつながった。そしてさらに、近年は計量的文明論としての「文化多様体解析（Cultural Manifold Analysis, CULMAN）」という方法論の確立を目指す研究の一環として位置づけられている。

本研究の背景と意義は、以下の通りである。

冷戦の終了以降、世界情勢のダイナミックな変動とともに、政治、経済、社会の伝統的枠組が大きく変わり、社会生活の基盤であった人々の信頼のあり方も大きな影響を受けている。伝統的な産業社会から高度情報化社会への過渡期と見られる現在、従来の家庭、学校、職場での人間関係のあり方にも崩壊が生じ、新たな時代の流れが確立するまでの混乱が続いてきた。日本経済はバブル崩壊以降、「失われた 10 年」と言われたが、その状況が 10 年をはるかに越えて続く中で、さらに、2011 年 3 月には東日本大震災とそれに伴うフクシマ原子力発電所事故という未曾有の災難を被り、その復興の途上で混迷が続いてきた。

一方、政治経済の視点からは、欧州共同体や南北アメリカ圏のみならず、東アジア圏の再編成が唱えられてきた。東南アジアを含む東アジア圏は、欧州とは異なり、多様な文化、歴史を持つ国々や地域の集合であり、政治にせよ経済にせよ、それらの統合は必ずしも容易ではないといわれたが、現実には ASEAN 等の協力関係が推進されつつある。我々が 2002 年の東アジア価値観調査を計画した時には、「東アジア」という言葉はまだ一般には曖昧なものでしかなかった。その後、「東アジア共同体」構想についての議論が高まり、特に戦後長期に継続した自民党政権から民主党政権になり、その構想が掲げられたが、沖縄米軍基地移転問題などを含め、日中米の国際関係の中で警戒感を巻き起こした。しかし、アジアと太平洋の各国の多様な連携協力は着実に推進されており、「アジア・太平洋共同体（APEC）」や「環太平洋戦略的経済連携協定（TPP）」等々の国際協力の枠組みの検討が進展し、2012 年末に再び自民党政権へ戻り、この勢いが加速されている。時は、「文化の多様体」（吉野,2005; Yoshino, Nikaido & Fujita, 2009）が構築されているかのようである。

こういった世界の流れを的確に把握し、将来を見通すための実証的基礎情報を収集すべく、各

国、各機関が様々な社会調査、国際比較調査を遂行している。例えば、世界価値観調査（World Values Survey）は世界の数十カ国で共通質問項目を用いた国際比較調査データや時系列比較可能なデータを提供し、学術研究にも行政施策にも資するところが大きい。しかしながら、過去の東アジア地域における調査の実情を詳細に調べてみると、その結果には疑いが隠せない。国際比較調査では、質問項目を各国の言語に適切に翻訳することが重要な手続きであるが、各国内の事情の差異を見過ごしたための誤訳が見受けられ、また、報告された回収率などから、計画された統計的無作為標本抽出の手続きが調査の現場でどこまで遵守されているのか、疑義を持つ調査研究者も少なくない。

以上のような背景があり、我々は、アジア・太平洋地域の調査は、やはり当該地域の人々によって慎重に推進されるべきであるという認識に至った。我々は、各国でどの程度統計学的に適正な標本抽出調査が遂行でき、また国際比較可能性が保てるのかという課題を実証的に検討することを主眼にし、その上でアジア・太平洋諸国の人々の価値観や意識を比較分析することに取り組んできた。この中で、各国で日常、厳密な統計調査がどの程度なされているか、それ自体が各国の社会の状況を如実に表していることを強く認識してきた。

今回の調査票は、人々の生活一般に関する多様な項目を含んでいる。しかし、特に 21 世紀初頭の急変しつつある世界情勢、とりわけ、急速に変化するアジア・太平洋の国々と、数々の問題を抱えながらも再秩序化されつつある国家間の関係を考慮して、日本と他のアジア・太平洋諸国の人々の価値観、对人的信頼感や法意識を含む人間関係に関する意識、自然観や生命観等の統計的解明に適切と思われる項目を検討した。結果として、多くの項目は、2002-2005 年度の「東アジア価値観国際比較調査」及び 2004-2009 年度の「環太平洋価値観国際比較調査」と重複しているので、重複して調査されている国・地域は、この 10 年ほどの時系列調査ともなっている。国際比較調査では費用、時間、労力のみならず様々な技術的限界が常に付き纏うものであり、目前の多様な問題解決へ直ちに繋がるような調査項目の選定は容易ではない。今後の各方面での調査データや情報を、相補的に考慮して研究を推進するのみである。

アジア・太平洋諸国の社会状態は複雑であり、特に中国、そしてインドの躍進は目覚ましいものがある。一方でどの国も政治的にも決して一枚岩ではなく、地域や階層の間の著しい経済格差を抱え、それが国際関係の進展にも影を投げ、将来を予測するのは容易ではない。それゆえに、各国の客観的実態統計とともに、各国民の意識や価値観の動向を的確に調査する意義がある。我々の基本方針は、現地で通常用いられている調査方法を尊重し、その実態を学ぶことである。国や地域によっては、しばしば、回収データの質の低さの点で、これまで我々が遂行してきた国や地域と比較して、統計的方法論や実践的手続きなどの諸問題に憂いを抱かざるを得ないが、調査研究者としてはそのようなデータの中から、いかに信頼できる情報を抽出できるか考えていかねばならない。データ解析も、実際の調査では避けられない各国・各地域の言語の差異、調査方法の差異などを考慮し、単純に回答分布の皮相な数字の大小比較ではなく、今後収集されていく他の関連諸国・地域の調査データや資料、情報とともに、慎重に時間をかけて安定したパターン構造を浮かび上がらせるような分析がなされて行くべきである。それゆえ、本報告書は、国内外の多くの方々に速やかに基本情報を提供すべく、一次報告として刊行されている旨を御了解願いたい。

（文責 吉野諒三）

※注意 1. われわれの調査としては、シンガポールと韓国は 3 回目、オーストラリアは 2 回目となる。各国では、日本での住民基本台帳等にもとづく無作為標本抽出法とは異なり、各国の事情に沿ったエリアサンプリングを適用しているが、机上の計画と実践はしばしば乖離があり、その実態を把握することは重要である。しかし、日本でもそうであろうが、現地調査機関は顧客（統計数理研究所）に対し、その詳細を明示することは煩雑であり、また机上の理念からの乖離を合理化することは困難であり、しばしば隠蔽しがちである。我々は、現地調査機関の実践上の困難への対処の努力を評価しながら、彼らに執拗に説明を求め、理論と実践の関係を明確にするように努めた。この中で、各国の調査の詳細が 2 回、3 回目になり、ようやく判明してきたことも多く、あらためて理論と実践の差違に留意する重要性を再認識した。

※注意 2. 過去の調査について、統計数理研究所の Web ページも参考にして頂きたい。

※注意 3. 2004-2009 年度の「環太平洋価値観国際比較調査」に関して、同調査がインドを含めていたため、過去の報告書や論文等で「アジア・太平洋価値観比較調査」の名称が用いられていた場合があったが、今後は、3つの関連する調査を明確に区別するために以下のように正式名称を定めることとする。

- ・「東アジア価値観国際比較調査」（2002-2005 年度）
- ・「環太平洋価値観国際比較調査」（2004-2009 年度）  
(注. 科学研究費プロジェクトとしては 2006-2009 年度)
- ・「アジア・太平洋価値観国際比較調査」（2010 年度-2014 年度）

#### 謝辞

本研究は日本学術振興会による科学研究費補助金・基盤研究 S（課題番号 No.22223006、研究代表 吉野諒三）の御支援により遂行されている。

今回のアジア・太平洋価値観国際比較調査は、これまでの一連の調査研究の延長線上にあり、これらの研究は、文部科学省研究振興局学術研究助成課、機関課、情報課、日本学術振興会、トヨタ財団、日本財団、笹川財団をはじめ、官民の多くの方々や団体の御支援を得て遂行されたものであり、深く感謝いたします。

また、本報告書の作成の作業は松本拓郎、増井美佳、岩永有史、臼杵悠、青野桃子、守屋美雪、佐々木藍子、ヘロル・ガイビン（順不同）の諸君にお手伝いいただきました。皆様に感謝いたします。

# The Asia Pacific Values Survey --- Cultural Manifold Analysis (CULMAN) on Peoples' Sense of Trust --- Singapore 2012 Survey

Ryozo Yoshino

## 1. Introduction

This is a report on Singapore 2012 Survey as part of “the Asia-Pacific Values Survey” (2010-2014 fiscal years) by the cross-national survey team of the Institute of Statistical Mathematics (Chief: Ryozo Yoshino). We are developing this study in order to exemplify practical research of a new methodology for cross-national comparative survey, called CULMAN (Cultural Manifold Analysis) (See Yoshino, 2005; Yoshino, Nikaido & Fujita, 2009). It is part of the broader research project that is meant to build on and expand the two predecessor projects: the East Asia Values Survey (2002-2005), and the Pacific-Rim Values Survey (2006-2009). In 2010, we conducted fieldwork for the surveys in Japan and the United States. In 2011 we did the same in three locations in China (Beijing, Shanghai and Hong Kong) and in Taiwan.

And we carried out surveys in Singapore, Australia, and South Korea in 2012 using the statistical sampling method appropriate for each location and through face-to-face interviews.

This brief monograph gives some historical background of the study. On the other hand, we would like to refer readers to Yoshino (2001, 2005c, 2006, 2009), Yoshino & Hayashi (2001), and Yoshino, Nikaido & Fujita (2009) for more detailed English explanation on the methodologies such as back-translation technique for questionnaire and statistical random sampling, a paradigm of cross-national comparability, etc. As for the information on our past surveys, see a series of ISM Research Reports published over decades, or our home page of the Institute of Statistical mathematics. ## 2. Some History on Our National Character Survey

The Institute of Statistical Mathematics (ISM) has been conducting a longitudinal nationwide social survey on the Japanese national character every five years since 1953, using the same questionnaire items (Mizuno et al., 1992). The survey is called “Nihonjin no Kokuminsei Chosa” (Japanese National Character Survey). Although definition of the term “national character” may be very problematic, here it simply means the characteristic shown in people’s response patterns to a questionnaire survey (Hayashi et al., 1998; cf. Inkeles, 1997). The question items cover various aspects of people’s opinions about their culture and daily life. This survey was one of the foundations of the public opinion survey system based on the statistical sampling theory developed immediately after World War II in Japan. The

significance of this survey was clear at the time when Japan was expected to shift from the military regime to a democratic system in the latter half of 1940s (Yoshino, 1994). This survey stimulated many countries to carry out the same sort of time series surveys such as the World Values Survey, Eurobarometer, General Social Survey (GSS) of USA, ALLBUS of Germany, CREDOC of France, etc. (There was a time that the post-war Japanese democracy had been criticized because it was not democratic from a viewpoint of the Western world. Interestingly, however, Japan conducts public-opinion polls based on statistically ideal sampling using an almost complete residential or voters' list whereas the other countries have to use other methods such as quota sampling or random-route sampling. The latter two sampling methods consider statistical randomness but do not yield the statistical estimate of sampling errors. As far as the system of public-opinion polls is concerned, therefore, Japan may be more democratic than the Western countries in the sense of inclusiveness and representativeness.)

Since 1971, the survey of ISM has been extended to a cross-national comparative study for more advanced understanding of Japanese national character (Hayashi, 1973). The focus of our cross-national surveys is the investigation of the statistical comparison of peoples' social values and their ways of thinking and feeling. More explicitly, our concern has been with cultural identities and people's attitudes toward economy, freedom of speech, interpersonal relationships, leadership, politics, public acceptance of science and technology, religion, social security, etc. These aspects may clarify certain similarities or dissimilarities that are represented by psychological distances between countries or races in certain statistical pattern analyses of responses (Hayashi, 2001a, 2001b; Hayashi et al., 1998; Yoshino, 1994, 2001c).

**Note:** Although the Japanese title of the survey project 2004-2009 literally means the Pacific-Rim Values Survey, the title “The Asia-Pacific Values Survey” was occasionally used for the project in the past English publication, because it covered not only Pacific-Rim Area but India. From now on, we designate **the Pacific-Rim Values Survey** (effectively 1<sup>st</sup> round of the Asia-Pacific Values Survey) for the 2004-2009 project and **the Asia-Pacific Values Survey** for the 2010-2014 project (effectively 2<sup>nd</sup> round the Asia-Pacific Values Survey).

-----

The cross-national survey, however, involves particular methodological problems. It is not simple to compare response data collected under different conditions. Different countries may use the same questionnaire but in different languages and employ different statistical sampling methods as well. There is no *a priori* knowledge as to how these different conditions influence peoples’ responses even in the case where there is no substantive difference of opinions and social values between peoples (Yoshino, 2001c). Thus, an important problem of our study is to investigate those conditions under which meaningful ***cross-national comparability*** of social survey data is guaranteed. As our approach towards this problem over decades, we have been developing the methodology called **CLA (cultural link analysis)**. The main components of CLA are 1) a spatial link for cross-national comparison, 2) a temporal link inherent in longitudinal analysis, and 3) an item-structure link inherent in the commonalties and differences in item response patterns within and across different cultures (cf. Guttman, 1972). In CLA we utilize, for example, the back-translation technique and statistical pattern analyses such as Hayashi’s Quantification Method (Hayashi, 1992) or Yoshino’s (1992a, 1992b, 1994, 2001c) Super-culture Model. The utilization of those pattern analyses consists of an important part of our methodology. Namely, although a simple cross-national tabulation of people’s responses with respect to a single item may not be reliable because people’s responses may occasionally be sensitive to slight differences in the wording of certain questions, certain pattern analyses or scaling on a set of items can be reliable. (See Yoshino & Hayashi [2002] for an overview on our approach.)

On the other hand, in this cross-national study, we have found some response tendencies particular to certain countries. For example, the Japanese tend to avoid polar answer categories and to choose intermediate categories, whereas the French generally tend to give

negative responses to any question. (Here I may be exaggerating these tendencies to make the points clearer.) I think that we should consider these response tendencies when we analyze not only people's sense of trust but public opinion polls or social survey data in general.

See Hayashi (2001a, 2001b), Hayashi et al. (1998), Yoshino (1994, 2001c, 2002, 2005, 2006, 2009), Yoshino & Hayashi (2002), Yoshino, Nikaido & Fujita (2009), and Yoshino, Hayashi & Yamaoka (2010) for results of our cross-national surveys.

### **3. Japanese national character survey (1953-present)**

Our longitudinal survey of Japanese national character shows some stable aspects of attitudes and social values of the Japanese (Hayashi & Kuroda, 1997; Yoshino, 1994). Among others, the stability of interpersonal attitudes and religious attitudes may distinguish the Japanese from other countries. Namely, the Japanese show a higher score on the "Giri-Ninjo scale" than the other countries. Moreover, while only one third of the Japanese have religious faith, but more than 60% of the Japanese support the opinion that religious attitudes are important (Yoshino & Hayashi, 2002; Yamaoka, 2000).

I will briefly explain certain fundamental dimensions of the Japanese social values as follows.

#### ***Fundamental dimensions of the Japanese social values***

Hayashi (1993) has identified two important dimensions that underlie the Japanese national character in the survey. That is, 1) the dimension of interpersonal relationships ("Giri-Ninjo" attitude, or a complicated sense of humanity and obligation that is particular to the Japanese interpersonal relationships) and 2) the dimension of a modern-traditional contrast in their way of thinking. On one hand, as mentioned before, the Japanese interpersonal attitude has been stable, at least over the last half century, and probably for much longer than our longitudinal survey. This corresponds to the first dimension. On the other hand, for over 100 years since the Meiji Restoration in 1868, Japan has been doing her best to overtake Western science and technology and to develop it into a Japanese adaptation. Probably this enduring effort has underlined the dimension of the tradition vs. modernity orientation in the Japanese way of thinking.

However, the Japanese way of thinking has been gradually changing, and there appeared a generation gap between people of 20-24 years old and those older than 25 years in our survey of 1978 (note that the younger generation was born more than 10 years after the end of World War II. In 1956, the economic white paper declared, "Japan is no longer in the post-war condition," and this symbolized the start of the high-speed development of industry and economy. On the other hand, however, Japan had to face many social problems concerning pollution because of the high-speed industrialization around 1970. Since the signs of the younger generation's changes appeared as early as 1978, their current way of thinking has become more complicated than ever.

Furthermore, the Japanese have been in the confusion of the transition period from the established social system to a system of a highly advanced information age. In this confusion,

a Central Research Services, Inc. (2000) survey reported the majority of Japanese people's distrust toward traditional systems such as banking, bureaucracy, as well as of congressmen, police, etc., in spite of the stereotype of the Japanese as a highly trustful nation (Fukuyama, 1995).

#### **4. The World as a Cultural Manifold**

The 20th century was the time of expansion of Western civilization. Differences of cultures occasionally prevented us from our understanding each other. In this time of globalization, I would like to emphasize the fact that there are various ways of successful social development, therefore, we should not impose one's own social value on any other country if we intend to develop a peaceful world.

The globalization necessarily changes some institutional systems and customs towards more universal ones under the influences of transnational exchange or trade. On the other hand, some other systems are becoming more and more sensitive to cultural differences, as a reaction to the globalization.

In order to facilitate the mutual understanding between the East and the West, we need to keep in mind the differences of social values between them. The study on the scale of trust (Yoshino, 2005, 2006, 2008) may caution us on the applicability of a certain "single" scale invented by the Western cultures to the Eastern cultures, or vice versa. For example, it is not always the case in Asia that "the distrust is a culture of poverty" as Banfield (1958) once mentioned. A Chinese proverb says that "Fine manners need a full stomach" (or "The belly has no ears"), but another says "Be contented with honest poverty." Gallup (1977, p.461) reported that they could not find a very poor but still happy people in their global survey. I think that they missed the reality. For example, Brazilians were very optimistic even when Brazil fell down to the worst debtor nation in the world (Inkeles, 1997). Inglehart reported a correlation of .57 between economic development and life satisfaction for some 20 countries surveyed in 1980s (Inkeles, 1997, pp. 366-371). But the life satisfaction of Japan in the 1980's was lower than around 2000, although Japan was close to the top of the world economy in those days and now she has suffered from depression over two decades. Thus, we need scales constructed from various perspectives of social values in order to understand various cultures in the age of globalization.

Although China had so many battles between small countries (within the area corresponding to the modern China) over thousands of years in their history, once they were synthesized as a large empire, their government employed peoples of various races as high-class bureaucrats. This made it possible for them to develop and maintain a large empire and their culture, often over centuries. This is analogous to the Roman Empire, but it is contrastive to the modern Western countries (and Japan during WWII) that colonized Asian and African countries in the 19th and 20th centuries. The history shows that trust between different races changes according to social conditions in the short run,

although it is relatively stable over time.

After our previous China survey (China 2001 survey [Yoshino, 2006]), there occurred the problem of SARS spreading from Guang-Zhou in China. People inside and outside China criticized the local governments, suspecting that they attempted to hide the serious conditions. This seems to suggest a significant change of China, from secretive attitude to more open attitude for every matter. The secretive attitude was linked to the system of severe punishment on political responsibility. The open attitude is a key to democracy that is necessary for successful capitalism. The then mayor of Beijing got fired because of his mishandling of SARS. The government started encouraging people to inform of the presence of patients. This situation seems to show that China is changing rapidly, but in a Chinese way. Here it may be important to quote Dogan (2000)'s statement "... Erosion of confidence is first of all a sign of political maturity. It is not so much that democracy has deteriorated, but rather the critical spirit of most citizens has improved..."

In spite of prevailing confusion in East Asia (actually in the entire world), I hope that East Asia will advance towards the peaceful development without serious conflicts. For the mutual understanding among Asian countries, one should keep in mind their ways of thinking such as "Mentsu (face)" and "Honne and Tatemaie (real intension and principle)" of the Chinese, the Japanese, and the Korean. This is also the case with the Asian countries for their understanding of the West.

Once upon a time, Weber (1904-05) argued that Asian countries were not able to develop capitalism in his theory on religion and capitalism. Now we know so many counter-examples such as Japan, Korea, NIES, and China, against his argument. Some people argued that the Japanese adaptation of Confucius philosophy adapted to Japan functioned as a replacement of Protestant ethics and led Japan to a successful development of capitalism (Morishima, 1984). But the past decades have seen many examples to show that economic success is not linked to a particular ethics, ideology or religion. Now we have more and more data to consider the relationships between economic development, social systems and social values because of the rapid change of social systems in many countries of the world than before.

In 2010 spring, we started a new project "The Asia-Pacific Values Survey" and carried out a nationwide face-to-face survey in Jap and USA during November of 2010 to January of 2011. This project will cover at least all the countries and areas of the previous project "Pacific-Rim Values Survey", and possibly other countries such as Philippines, Thailand, and Vietnam.

I hope that our survey data will be helpful for further constructive arguments, and the mutual understanding for the peaceful development and economic prosperity of the world.

Ryozo Yoshino

**Note 1:** For our research team the surveys in Singapore and Korea have been 3<sup>rd</sup> installments, and one in Australia the 2<sup>nd</sup> respectively. In each country we have employed an area sampling method that accommodates the specific circumstances and conditions therein, which does differ from the kind of random sampling method used in Japan based as it is on the national residential registry system. It is important for the researchers to grasp the nature of the ground-level operations of actual surveys as they happened, as real-life practice could differ from plans on paper. While we believe this to be no different in Japan too, but the local survey research operators tend to conceal information to the client (i.e., the ISM), both because the relaying of such minute details can be cumbersome, and that it is conceptually difficult to legitimize any discrepancy between theory and actual practice. As far as possible we have goaded the local survey operators to explain and clarify the relations between theory and their actual practice, while appreciating their efforts to overcome the practical and logistical difficulties of carrying out a survey research project. We like to note that there are many revelations and insights that have come to us only in our second and third attempts at survey research in the three countries. We have been reintroduced to the importance of being sensitive to the discrepancy between theory and practice.

**Note 2:** In the case we find some errors in our reports or data, we will list them in our home page: <http://www.ism.ac.jp/~yoshino/>, where you can see our past surveys too.

**Note:** As written before, although the Japanese title of the survey project 2004-2009 literally means the Pacific-Rim Values Survey, the title “**The Asia-Pacific Values Survey**” was occasionally used for the project in the past English publication, because it covered not only Pacific-Rim Area but India. From now on, we designate **the Pacific-Rim Values Survey** (effectively 1st round of the Asia-Pacific Values Survey) for **the 2004-2009 project** and **the Asia-Pacific Values Survey** for **the 2010-2014 project** (effectively 2nd round the Asia-Pacific Values Survey).

**Five volumes have been published as a series of “Japanese National Character Survey” by Shisei-dou (Vol.1, 2 & 3) and Idemitsu-syoten (Vol.4 & 5).**

## 研究の目的

本調査プロジェクトの概要は、以下のとおりである。

1) アジア・太平洋の諸国における統計的標本抽出調査（個別訪問面接法）によるデータ収集を遂行する（平成 22-25年度）、2) この国際比較データと、半世紀以上にわたる「日本人の国民性」調査の時系列データを交絡させる（平成 25年度）、3) これらの新たに収集されたデータを、既存の関連調査データとともに総合的に分析することによって、空間的・時間的比較の枠組みの中で、日本人の意識構造の安定性と変容を実証的に浮かび上がらせる。最終的に、調査データの一般公開を推進させる。

## 本年度（～平成 25 年 3 月 31 日）の研究実施計画

本年度は、主として、以下の1)～8)を遂行する。

- 1) 昨年度の香港調査のデータ収集の遅れに伴う、作業の積み残しを完了する。これに関連して、調査報告書（北京、上海、台湾、香港）のデータ整備、報告書作成、発刊、配付の作業を遂行する。
- 2) これまでの日、米、中国調査の結果を受けて、本年度の韓国・シンガポール・オーストラリア調査のための関連基礎資料を収集・整理する。
- 3) 韓国、シンガポール、オーストラリアの調査環境について現状を再確認し、現地調査研究者と連携しながら、統計的標本抽出方法の実践的検討を行い、調査票案を作成する。
- 4) 調査票案を複数のバイリンガルにより、翻訳、再翻訳を繰り返し、韓国語、シンガポール英語・マレー語・タミル語、オーストラリア英語の調査票案を作成する（バック・トランスレーションによる検討）。
- 5) 韓国、シンガポール及びオーストラリアの研究協力者及び調査機関と標本抽出方法と調査票について検討、最終計画を確定する。
- 6) 韓国、シンガポール及びオーストラリアの本調査を遂行する。
- 7) データ・クリーニング作業の検討を経て、集計と報告書作成の作業を遂行する。
- 8) 以上の作業の結果をまとめ、現地研究者と連絡しあい、調査結果の解釈について検討し、第一次報告書(速報)をまとめる。報告書の印刷、出版、各方面への送付の作業を進行させる。

## 2 アジア・太平洋価値観国際比較・シンガポール 2012 調査の標本抽出計画と回収状況等

### 2.1 調査方法の概要

#### 〔調査対象〕

1. 母集団：シンガポール全国に居住する成人（21歳以上）で、シンガポール国籍保持者および永住権保持者（Permanent residents）の双方を含む。
2. 標本：計画標本 1000 名（100 地点、各地点から 10 名）。
3. 抽出方法：統計的無作為抽出法
  - ・ a) 層別 2 段抽出法により世帯抽出し、抽出された各世帯での成人すべての中から誕生日法により個人を抽出する。
  - ・ b) 世帯の抽出台帳として、シンガポールの通商産業省統計局のサンプリング・フレームを用いる。このサンプリング・フレームには、層別 2 段無作為標本抽出に合わせ、指定された抽出基準に則った（デジタル化された）世帯名簿を用いる。世帯名簿は、2010 年の人口センサスにおけるすべての世帯の記録から作成されたもので、家計調査の包括的なサンプリング・フレーム作成のために毎月更新されている。
  - ・ c) 世帯抽出には、第 1 段が投票区、第 2 段が住宅ユニット（Housing Units）による層別 2 段無作為標本抽出を用いる。
  - ・ d) 第 1 段の投票区は、3 つの主だった家屋タイプ、すなわち「公営住宅(HDB: Housing & Development Board)」、「私有住宅および私有アパート」、「その他」に層別化されている。投票区は、各投票区の世帯数に基づき確率比例抽出によって選ばれる。
  - ・ e) 第 2 段の住宅ユニット（Housing Units）は「一戸建て(detached)」、「連続住宅(terrace)」、「1 部屋」「2 部屋」といった住居形態によって第一段よりもさらに詳細に層別化されている。抽出された各投票区において住宅ユニット（Housing Units）が統計的に無作為に抽出され、これが PSU（Primary sampling Unit）となり、各 PSU において同じ住宅タイプの中から 10 世帯が抽出される。（シンガポールでは集合住宅が大多数であることに留意する。）上記 b) の DOS のシステムによって与えられたランダム・ウォークのスタート地点となる世帯から始め、同じ階の左から右へ、次は下の階の世帯へと回答者を求めて回る。ただし、同じ建物の中でも住宅タイプが異なるものがあるので、あらかじめ定められた住宅タイプと同じ世帯のみを訪れる。もし、その集合住宅であらかじめ定められた数（10 名）を回収できなかった場合は、隣の Housing Block で住宅タイプが同じ建物で、同様の操作をする。
  - ・ f) 回答者（標本）の抽出には、前段階で抽出された各世帯において、21 歳以上で、調査日においてもっとも最近誕生日を迎えた人を抽出する誕生日法（last birthday method）を用いている。  
(注意)あらかじめセンサスに基づく性別・年齢層別・人種別の割り当て表が作成されているが、これによる割り当て法（クォータサンプリング）が用いられているわけではなく、現実には、上記のランダムサンプリ

ングにおいて回答者の協力率の偏りによる有効回収標本の偏りが著しくはならぬかを確認するために使用されているようである。

#### 〔調査方法〕

シンガポールの調査機関 Media Research Corporation が、中国系、マレー系、インド系が混在した調査員 15 名による個別面接聴取法を遂行する。

#### 〔調査票〕（別紙調査票参照）

1. 一般質問項目：54 項目（多項目選択回答項目及び自由回答項目）
2. 基本属性項目：9 項目

#### 〔調査日程〕

本調査実施：2012 年 11 月 7 日から 2013 年 1 月 10 日にかけて実施。

(注意) 実査では、韓国 2012 調査やオーストラリア 2012 調査と同様、回収率や各種のコストを考え、必ずしも机上の標本計画通りには、統計的に厳密なランダム・ルート法が行われていないことに留意すべきである。実査後の現地調査機関とのやりとりから、おそらく以下のようなことが実際に行われていることが推察される。

サンプリング・フレームから抽出された地点リスト表 1 では、PSU の番号 (SNO) が 1 から 118 までである。他方、実査が行われた地点リストである表 3 では、途中抜けている番号 (MSNO) があり、地点数は 104 である。これは、調査を全国で同時に進める際に、計画通りの 100 地点で標本サイズ 1000 名が回収できるかどうかは予め不明のため、調査計画時にあらかじめ予備地点を含め、118 地点を調査地点の候補としていると思われる。実際に調査を開始した地点で、割り当て表通りの人数 (各地点で 10 人) の回答者を得るのが困難と判断した際に、近隣の予備地点で補うことにしているらしい。

各地点での調査が進行するに従い、計画サンプルサイズの 1000 名回収が達成された時点で、それまで調査された地点数が 104 地点で 1021 名の回収であったということのようである。(実際には、1030 人回収した時点で調査を完了として、データを確認して、最終的には有効回収票が 1021 人分ということらしい。)

地点リストとして抽出されながら実査が行われなかった 15 地点 (表 1 にあって表 2 にない地点) の特徴として、住居タイプに偏りがある。15 地点のうち、Bungalow が 2 地点、Semi-detached が 2 地点、Terrace が 1 地点、Condominium が 8 地点、そして Other private が 2 地点であり、公営住宅 (HDB) については 1 つもない。公営住宅に住む住民の割合の多さや、後掲するセンサスと回収標本の差に関する表において公営住宅以外の地点での回収数が少ないことも考慮すると、公営住宅以外の人々からの回収率は普段から低いものと推測されるために、HDB 以外の地点リストが予め多めに抽出されているのかもしれない。

ここで、計画通りの 100 地点で総計 1000 名を回収するのではなく、118 地点を抽出する際に、1) 初めから 118 地点を層別に無作為抽出する方法と、2) はじめに 100 地点を抽出し、住宅タイプや地域による過去の調査協力率の差違を考慮して、計画の 100 地点のいくつかに予備地点を用意するのでは、厳密には統計的に異なるので留意すべきであろう。ただし、コストと精度のトレードオフを実践上、考慮したうえで、シンガポール、オーストラリア、韓国などの現地の調査機関は経験的に上記のような方法を用いているのであろう。

なお、日本の調査方法とは異なるので、厳密な「回収率」の比較はできないが、現地の調査機関によると調査協力率は世帯レベルで 31%、個人レベルで 18%であった (詳細は、以下の表 5 を参照)。高層集合住宅の多いシンガポールでは、各戸を訪問して粘り強く回答者を求めるよりも、次々と各世帯を回ってすぐに応じてくれる回答者を求める方が容易であろうことは、推察される。

※本表で“successful”の合計は 1030 である一方、有効回収標本数が 1021 であるのは、回収した調査票のうち無回答が多くあった 9 つを除外したためとのことである。なお、日本の調査方法とは異なるので、厳密な「回収率」の比較はできないが、現地の調査機関によると調査協力率は世帯レベルで 31%、個人レベルで 18%であった。高層集合住宅の多いシンガポールでは、各戸を訪問して粘り強く回答者を求めるよりも、次々と各世帯を回ってすぐに応じてくれる回答者を求める方が容易であろうことは、推察される。

## 2.3 有効回収標本の詳細

本節では、有効回収標本とセンサス・データの統計量の対照をするが、本調査の標本抽出計画は、日本のように住民基本台帳等における個人リストに基づくのではなく、センサスの「世帯データ」に基づいていることに留意する。

※本表及び以下に掲げるセンサスに基づく表は、回収標本同様に、永住権保持者（Permanent residents）を含んだデータである

センサスでは「21歳から24歳」までのカテゴリーはない。そのため、有効回収標本と対照させるために、「21歳から24歳」までの人数を「20歳から24歳」のカテゴリーの統計の80%として推計したのが以下である。

## Shin Joho Centre's Asia-Pacific Values Survey 2012

### Survey Methodology

#### 1. INTRODUCTION

Shin Joho Centre commissioned Media Research Consultants Pte Ltd (MRC) to undertake a cross-national project – the Asia-Pacific Values Survey – in Singapore. This survey aims to find out individuals' values, lifestyles, beliefs and the like on a nationally representative sample in Singapore.

#### 2. SAMPLING DESIGN

- The sample consists of 1021 Singaporeans/PR, aged 21 years and above.
- The sampling frame adopted came from the Department of Statistics (DOS), Ministry of Trade and Industry.
- The sampling frame follows a two-stage stratified random sampling design – a computerised Master List of Houses is derived from the records of all houses listed during the 2010 Census of Population, and is updated monthly to provide a comprehensive sampling frame for household surveys.
- The sampling unit for the First Stage is Polling Districts (PD), where PDs are stratified by 3 predominant house types, namely Public Housing (HDB), Private Houses and Apartments, and Others (Landed Properties). The PDs were selected with probability proportional to size (i.e., number of houses within each PD).
- The sampling unit for the Second Stage was Housing Units. Within each selected PD, the Housing Units are stratified by detailed housing types: detached, terrace, 1-room, 2-room, etc. For every selected PD, Housing Units were selected by systematic sampling with a random start.
- This method of two-stage stratified random sampling yielded an overall equal probability and self-weighting sample while ensuring good control over the sample size.
- A sampling quota of 10 was set for each Primary Sampling Unit (PSU). For each PSU, selection of households was done on the same Housing Type, from left to right on the same level and then next level down. In the event that the achieved sample fell short, the remaining quota was sampled from the next Housing Block with reference to the similar Housing Type.

\*The DOS frame also gives a starting unit number randomly. The procedure is: the starting house to attempt is the PSU number. From there, interviewers are to walk towards the right hand side of the next unit bearing in mind that it has to be of the same housing type. They will proceed downwards to the next floor. If they are not able to achieve the 10 units, then they will proceed to the next block.

- For within-household respondent selection, the last birthday method was used.
- An overall sample quota interlocked by gender, age and race based on the DOS 2012 Population Statistics was used as a reference to control the distribution.

\* Sampling was done on a random route. A quota table of Age Group X Gender X Race was used as merely a reference point to benchmark the representativeness of the sample returned. This is a usual practice in our legitimate surveys to ensure that the sample yielded by the random route does not overly deviate from the general overall representation of the population. Reason being extreme deviation may be a result of on-the-ground deviation from the expected data collection procedures and standards.

### **3. SURVEY MATERIALS**

The following documentations were provided for the interviewer:

- MRC Identification Badge and Authorisation Letter
- Information Worksheets, containing information about each household to be surveyed
- Survey Forms (with translated versions)
- Show Cards

### **4. FIELDWORK**

- All interviewers were briefed on how to administer the questionnaire and show card prior to fieldwork commencement. An instructions guide to interviewers was drafted and allocated to every interviewer to serve as a reference.
- The fieldwork began on 7 November 2012 and ended on 10 January 2013. Data entry and validation were concurrent with the fieldwork.
- A total of 15 interviewers, with a good mix of Chinese, Malay and Indian, were engaged to conduct this survey.
- The questionnaire was administered using door-to-door face-to-face methodology. The average time taken to complete a survey was about 30 minutes. It was conducted in English, Chinese, Malay and Tamil, whichever the respondent felt comfortable with.
- The response rate was 31% in getting a household to agree to participate in the survey. At the people level, the response rate was around 18%.

- Upon completion of interview, each respondent received a \$10 shopping voucher as a token of appreciation.

## INSTRUCTIONS TO INTERVIEWERS

### Survey Background

- a multi-national study among representative national samples of adults aged 21 and older in Singapore and several other countries.

### Survey Objectives

- to measure opinions and preferences relating to values.
- to compare the survey findings across countries in the Asia-Pacific region and to the results obtained in an earlier study several years ago.

### Target/Eligible Respondents

- Singaporeans/PR aged 21 and above (provided they are capable of responding to the questions)
- If there're more than 1 eligible respondent in the household, select the person who has most recently celebrated his/her birthday

### Methodology

- All interviews must be conducted door-to-door face-to-face.
- A starting location for each sample point will be given for you to canvass a neighborhood.
- DO NOT ask for referrals and/or approach friends and relatives.

### Administrating the Survey

- Always carry your MRC ID Card
- Interviewer-administered, i.e., in no instance should you give the questionnaire to the respondent. Always read the questions, and where indicated, hand the respondent the appropriate show card.
- Assure anonymity & confidentiality
  - Always inform respondents that their answers are confidential and will not be identified with them.

### Incentive to Respondents

- \$10 Fair Price voucher per respondent upon completion of survey
- Remember to obtain respondent's signature for acknowledgement of voucher

### Fieldwork Record

- Always record your survey progress in the record-keeping form thoroughly
- Use the codes on the form to note the outcome and reason for it with respect to each contact you make
- Be sure to include all of the non-respondents as well as those who participate.

**Questionnaire Instructions**

- Always remember to jot down the following:
  - Your surveyor code
  - Interview start & end time
  - Respondent address, particularly postal code
  - Respondent names & phone numbers, for verification purpose
  
- DO NOT read out response choices unless appeared on the show card (e.g., Q.5)  
'VOL' means voluntary responses.
  
- Multiple response questions: record a response for each item on the list (i.e., yes/no for selected/non-selected)
  
- Carefully follow the instructions that tell you which questions are limited to a single response and which allow for multiple responses
  
- DO NOT leave any items blank unless they are omitted because of a skip pattern.
  
- DO NOT read "other" (usually an "8") unless specifically instructed to do so (e.g., Q.54),
  
- NEVER READ "don't know".

- **Notes on Certain Specific Questions**

- **Q.s 10a and 10b:** Record all responses if more than one occupation is named (even if it is an inappropriate answer)
- **Q. 18a:** If the respondent states that he/she does not have a spouse or children, record this as "DK/NA". However, if the respondent offers a response on the 7-point scale even though he/she does not have a spouse or children, enter the response as given. This applies to **Q. 18b, Q. 18d, Q. 18e.**
- **Q. 21:** Read the items on the list from a. to k. Record the response as "yes" if the answer hedges along the lines of "*a little bit*", "*probably*", etc.
- **Q.23:** Do not ask if it is obvious that either the respondent or his/her immediate family member(s) is/are seriously ill.
- **Q. 27:** Make sure that the respondent has grasped the meaning of this question and understands that "agree" means accepting the concept that humanity/a lot of human feelings is lost.
- **Q.32:** Treat this question similarly to Q.27, but this time "agree" means that nothing can reduce the richness of human feelings.
- **Q. 34:** Please note that this question asks the respondent to choose 2 of the 4 options.
- **Q.50:** This is a multiple response question that allows the respondent to select as many items as appropriate.
- **Q.F3:** Please make sure that the respondent understands that highest level of education means education completed, not just attended.

### INTRODUCTION

Good morning/afternoon/evening. I am << read out interviewer name >> from Media Research Consultants Pte. Ltd.

We are doing a survey on Asia-Pacific Values in Singapore. Today, we have come to see you to ask some questions on behalf of the Singaporean segment of a comparative research project studying people's lives, culture and values around the world. We'd like to speak to the person in your household aged 21 years and above who has most recently celebrated his/her birthday. All the information and views you provide will be kept strictly confidential.

வணக்கம். என் பெயர். <<பேயரை வாசிக்கவும்>>. நான் மீடியா ரிசேச் கொண்டன் பிரைவேட் லிமிடெட் என்ற நிறுவனத்தில் இருந்து வந்திருக்கிறேன்.

நாங்கள் ஆசியா பசிபிக் கோள்கைகளைப் பற்றி சிங்கப்பூரில் ஆய்வை நடத்துகிறோம். நாங்கள் இந்த குடும்பத்தில் உள்ள 21h வயது அல்லது அதற்கு மேற்பட்ட அனைமையில் தனது பிறந்தநாளைக் கொண்டாடியவருடன் பேச விருப்புகிறோம். நீங்கள் கொடுக்கும் அனைத்து தகவல்களும், கருத்துக்களும் ரகசியமாக வைக்கப்படும்.

## 5. アジア・太平洋価値観調査・シンガポール 2012 調査における項目の出典履歴

以下に、2010～2014 年度のアジア・太平洋価値観国際比較調査（以下アジア・太平洋調査）のシンガポール 2012 調査における項目の履歴を示す。アジア・太平洋調査は、東アジア価値観国際比較調査（2002-2005 年度）とそれを拡大した環太平洋価値観国際比較調査（2004～2009 年度、以下環太平洋調査）の延長上にある。アジア・太平洋の調査票は、主として環太平洋調査の日本 2004A 調査をもとに、いくつかの項目の入れ替え、新問の追加、項目によっては回答カテゴリーを適宜変更したもの（Q2、Q3、Q22、Q42b、Q52 等）であり、また各国・地域の翻訳では、回答カテゴリーの尺度表現には程度の差こそあれ、不可避な差違があるもの（Q12、Q40 等）もある。現在進行中のアジア太平洋調査の調査票は、環太平洋調査、及びその注意事項にほぼ忠実に依拠している項目が多いが、一方でそれ以外の調査（特に日本癌病態治療研究会[1996]による「日本人の心とガン告知」、兵庫教育大学の平成 18 年度「生活と文化に関する世論調査」）を参考に、新しく組み込まれた質問項目もある。以下はそれらを踏まえた全質問の出典履歴である。個々の項目の変更に関しては、他国/地域の調査においては意味を持つがシンガポール 2012 調査とは関連性が薄い事項は省いている場合があるので注意する。

なお、各調査で各国語への翻訳は、基本的には、中国語（北京・上海、香港、台湾）や韓国語は日本 2010 調査票をもとに、シンガポール、オーストラリア、インドは USA2010 調査票をもとに作成されているために、しばしば日本版と USA 版とのニュアンスの差違が拡大されている懸念を完全に避けられないことに留意する。

また、シンガポール調査の中国語版調査票は、字体が同様の北京・上海調査の調査票をベースに作成したが、問 10b「信頼できない職業」、問 40b「太く短く、細く長く」、問 41b「心の解明」などについては、翻訳が日本語版により忠実と思われる台湾調査の調査票の表現を採用した。

※ 以下、文中の「KS」は「日本人の国民性調査」を指し、右端の「04B」は、日本 2004A 調査と同時期に遂行した日本 2004B 調査で同じ項目があるものを指す。

※ 韓国 2003 及び 2006 調査では、各質問の冒頭に相手への呼びかけや、「あなた」の代わりに、「相手のフルネーム（様）」を用いている。韓国 2012 調査も、実際にはその慣習に従っているが調査票では、「あなた」と表現していることに注意。

| 問9c  | 修正 |             | 東ア日本02・問50c<br>環太平洋・問9c  | 儒教精神<br>(妻は夫に従う)   | 問9a, b, f, gは、「すべき」という表現だが、その他の問9のc, d, eは、「である」という表現であったため、韓国2012では、問9のc, d, eを「すべき」という表現に揃えた方がよいという現地調査会社の提案を反映した。ただし、これまでの韓国2003、韓国2006の回答結果が安定していることは、過去の調査の表現も質問の文脈から判断できていたことを示唆している。問9のaと同様に、韓国2012では、問9のcを「すべき」という表現に変更した。<br>USA2006調査票の作成段階で間違いがあり、「従う」を“follow”とした。Australia2007の時点でこれに気付き、そのためAustralia2007とIndia2008のみ正しく“obey”となった。<br>アジア・太平洋調査の英語訳表現ではUSA2010を含め、「儒教的」な保守的価値観が明確になるため、“obey”にした。中国語表現もこのニュアンスを強調した表現としている。 |

| F1                         | 変更 |             | 七か国比較A票・F1 | 性別                                 | 通常、調査の際に回答者がサンプルとして適合するかどうかを確認するため、F1性別およびF2年齢の項目のみは先頭に出すのが一般的であるとの現地調査会社のコメントを反映し、韓国2012では、F1性別およびF2年齢の項目のみを最初の質問として変更した。ただし、F3以降の項目は、これまでの韓国2003、韓国2006と同様である。  |      |
| F2                         | 修正 |             | 七か国比較A票・F2 | 年齢                                 | 日本調査の対象者は20歳以上だが、米国や香港の場合、成人年齢が18歳以上のため、カテゴリー1は18歳から24歳まで。USA2010、香港2011でのサンプリングは性別、年齢に基づく割り当て法だったため、F1、F2は調査票の冒頭で訊かれている。日本調査では70歳以上も対象としているが、国・地域によっては、69歳以下を対象としているため、「11.70歳以上」を削除している場合がある。<br>F1と同様に、韓国2012では、F2年齢項目を最初の質問とするように変更した。<br>シンガポールの成人年齢が21歳であることを受けて、Singapore2012での調査対象は21歳以上とした（Singapore2007では20歳以上）。このため、選択肢1は、「21～24yrs」に変更。またSingapore2007では70歳以上を調査対象としていなかったが、今回は対象に含めた結果、選択肢11「70yrs and over」を追加。   |      |
